PROFESSIONAL SUMMARY

Fullstack and Web Systems Engineer with 6+ years of experience delivering government, aviation, finance, insurance, e-commerce, IoT, and AI-enabled platforms. Strong in PHP/Laravel, Node.js, Vue.js, React/Next.js, Python, PostgreSQL, MySQL, APIs, and cross-agency data integration. Experienced in leading end-to-end delivery, production operations, and secure, reliable system design.

TECHNICAL SKILLS

Backend: PHP, Laravel, CodeIgniter, Node.js, Express, Python, Django, Go, REST APIs, SOAP APIs
Frontend: JavaScript, TypeScript, Vue.js 3, React.js, Next.js, Tailwind CSS, WordPress/WooCommerce
Data & Real-time: PostgreSQL, MySQL, MongoDB, CockroachDB, TimescaleDB, Redis, MQTT, WebSocket
Platform & Tools: Git, Docker, Linux, AWS, Grafana, EMQX, Jest, PHPUnit, WebAuthn, geospatial mapping
Core Competencies: Multi-agency data pipelines, asynchronous programming, API design, system integration, CI/CD

PROFESSIONAL EXPERIENCE

Web Systems Engineer (GovTech) | DISKOMINFO DIY
Yogyakarta, Indonesia | Mar 2026 - Present

- Integrated an AI CCTV Monitoring Portal across 12 regional government sites through the SPLP interoperability layer, enabling unified monitoring and cross-system incident detection.
- Delivered Survey, DTSEN, and Manunggal Raharja data pipelines; maintained ~99.9% uptime, reduced cross-system data inconsistencies by ~30%, and supported onboarding for 350+ DISKOMINFO and social-services operators.

Web Systems Engineer (GovTech) | PT Kencana Konsep Indonesia
Bandung, Indonesia | Oct 2024 - Jan 2026

- Contributed as a Fullstack Developer to a national-scale SPLP system and a multi-agency data-consolidation platform.
- Built and maintained Laravel, Vue.js, Node.js, and Django services with MySQL/PostgreSQL, REST/SOAP integrations, and data-validation pipelines.

Web Systems Engineer | CV Milimeter Yogyakarta
Yogyakarta, Indonesia | Jun 2024 - Jul 2024

- Developed a custom online course platform within a tight project window using PHP, Laravel, and MySQL.

Web Systems Engineer | PT BPRS HIK MCI Yogyakarta
Yogyakarta, Indonesia | Sep 2023 - Apr 2024

- Replaced error-prone manual reporting with Laravel and MySQL workflows, improving data consistency and day-to-day operational efficiency.

IT Support | PT Maybank Indonesia Finance Tbk.
Yogyakarta, Indonesia | Jul 2023

- Provided short-term technical support and troubleshooting during peak operational demand.

Web Systems Engineer | PT ASI Pudjiastuti Aviation (Susi Air)
Pangandaran, Indonesia | Oct 2022 - Jan 2023

- Led engineering of the Susi Air Pilot Operations Dashboard, covering live aircraft telemetry, crew scheduling, flight-logbook integration, and multi-site reporting for regional hubs.

Web Systems Engineer (GovTech) | Secretariat of Sleman Regional Parliament
Sleman, Indonesia | Jan 2020 - Oct 2022

- Led backend, frontend, and integration work for a legislative management system using Node.js, React.js, PostgreSQL, and MySQL; integrated agendas, voting, and e-Report data through REST APIs.

Web Systems Engineer | PT Syariah Al Amin Life Insurance
Jakarta, Indonesia | Oct 2018 - Oct 2019

- Built sharia-insurance web and mobile workflows using Node.js, Laravel, CodeIgniter, Android (Java), and MySQL; integrated policy and claims channels through REST APIs.

FEATURED PROJECTS

Susi Air Pilot Operations Dashboard | Lead Web Systems Engineer | 2022-2023 | Aviation
- Real-time aircraft telemetry, crew scheduling, flight logbooks, and multi-site operational reporting for regional hubs. **Tech:** Laravel, Node.js, Vue.js, PostgreSQL, REST APIs, geospatial mapping. Live

XIV Apparel | Lead Fullstack Engineer | 2024 | E-commerce
- Custom WooCommerce storefront with multi-facet filtering, side-cart, guided checkout, OTP/WebAuthn login, QRIS gateway, admin CRUD, and containerized deployment. **Tech:** WordPress, WooCommerce, PHP 8.2, Tailwind CSS, JavaScript, Docker. Source

Aetherlo | Lead Backend Engineer | 2024 | IoT
- Microservice IoT platform for MQTT/TLS telemetry ingestion, time-series analytics, live device monitoring, and REST/WebSocket delivery. **Tech:** Go, EMQX, MQTT 5, PostgreSQL, TimescaleDB, Redis, Grafana, Next.js. Source

Islamic Digital Currency Engine | Fullstack Engineer | 2024 | FinTech
- Asset-backed, sharia-compliant ledger and payment engine with ACID consistency, settlement, audit trails, legal workflows, and regulatory reporting. **Tech:** Node.js, CockroachDB, REST APIs, JWT, digital signatures. Source

Lex Integrity | Fullstack Engineer | 2024 | Legal-tech / AI
- Offline legal-compliance matrix that maps Indonesian legal hierarchy, tracks regulatory contradictions, and highlights policy and abuse-of-power risks. **Tech:** MERN, local LLM. Source | Demo

54_testDNA | Backend Engineer | 2023 | Health-tech
- DNA-testing workflow covering sample intake, result processing, reporting, and lab/clinician/client portals. **Tech:** Node.js, PostgreSQL, REST APIs. Source

EDUCATION

Universitas Ahmad Dahlan | Yogyakarta, Indonesia
B.Sc., Informatics Engineering | Sep 2014 - Oct 2018
